FOREWORD

Dear Professors,

By 2030, India will be amongst the youngest nations in the world. With nearly 140 million youths in the college age group, one in every four graduates in the world will be a product of the Indian higher education system. By then, the already existing challenges for Indian higher education exacerbated unless we significantly transform our higher education model into our perspectives. Needless to say, Nation calls for a new vision, aspiration and hard work. We in Pune District Education Association wish to be pioneers of a higher education model that is not just the best but is delivering social, economic and intellectual values par excellence.

The idea behind describing the future is not to show a pipe dream or build a castle in the air but to confront our professors with what is at stake. We believe that the quality education is the right of students and the professors are meant for it. In order to succeed in this endure; we must first believe that we can do it together. For that we have to observe discipline and work diligently hard.

You all are therefore, requested to look at this note book in right perspective. We all are working together to cultivate the educational values and discipline come in reality. I wish you all a grand success in this endurance.

(Sandeep Kadam)
Honorary Secretary
Pune District Education Association,
Pune
